

Greetings -

I am writing in SUPPORT of NET NEUTRALITY, and I SUPPORT Title 2 oversight of Internet Service Providers.

I OPPOSE the repeal of NET NEUTRALITY RULES.

The Internet is a Public Good and should remain in public hands, not be controlled by private corporate interests able to determine what information I can access, and how I am able to access it.

The cable and satellite television providers, as well as telecoms companies, already exercise complete control over access to their content and its pricing. Let them continue to operate their businesses under current FCC guidelines and restrictions, but leave the Internet to the People.

Thank you for your time,

Thomas Cross III
